This plot of land with an area of 2,168 m², with the possibility of purchasing a project for the construction of a family house with a valid building permit, is located at the end of a cul-de-sac. Beyond is only nature, forest and peace. Only 647 people live in the village of Olšany in the Vyškov district, which is why living in this locality has an intimate community character.

Your dream of owning your own home may soon become a reality. You can start building this year on an area 66 m long and 40 m wide. Project documentation for the construction of a family house, including a valid building permit, is available for an additional fee of CZK 800,000.

The design of a single-storey low-efficient house with photovoltaics has a planned area of 143 m² of interior space, it has a layout of 3-bedroom with 2 bathrooms, a dressing room, a utility room, a terrace, a garage, additional parking on the property, a swimming pool and a garden house. All utility networks are at the border of the property and only one house is being built in the street with access via its own asphalt road with public lighting.

The quiet location of Olšany is located 30 km from Brno, 10 km from Vyškov and 7 km from Rousínov. A big advantage is the kindergarten right in the village of Olšany and the elementary school in the nearby village of Habrovany. A beautiful forest and a picturesque view of the surroundings will keep you company every day. It is not surprising that even the actor Bolek Polívka, who has his farm nearby, fell under the spell of the local nature.

The total area of the land is 2,168 m².
